We centralize and manage the demand of your entire logistics ecosystem

invasOMS seamlessly integrates with your systems to manage orders from a single platform, including B2B and B2C flows.

BENEFITS OF INTELLIGENT AND CONNECTED LOGISTICS

Increase in Sales and Conversion:

Improve customer experience and enable new flows such as click-and-collect and dropshipping.

Improved Customer Service:

Deliver high visibility throughout the entire order lifecycle with proactive notifications.

Centralized and Efficient Management: Orchestrate all demand and configure your own business rules for fulfillment.

Total Inventory Control: Gain visibility of distributed inventory across warehouses, stores, and darkstores.

Operational Optimization: Automate workflows, manage stockouts, and optimize courier selection.
